SAC 2013 Student Research Competition (SRC) Participants

Student Research Abstract: Reconstructing Shredded Documents .............................................................. 1
Computational Intelligence and Video & Image Analysis (CIVIA) Track
Razvan Ranca, University of Edinburgh, United Kingdom

Student Research Abstract: INDICIa: A New Distributed Clustering Protocol ............................................. 3
Data Streams (DS) Track
Mar Callau-Zori, Universidad Politécnica de Madrid, Spain

Student Research Abstract: Multi-ASIP Platform Synthesis for Real-Time Applications ............................. 5
Embedded Systems (EMBS) Track
Laura Micconi, Technical University of Denmark, Denmark

Student Research Abstract: A Novel Collaborative Intrusion Alert Correlation Model ............................... 7
Computer Security (SEC) Track
Huwaida Tagelsir Elshoush, Department of Computer Science, University of Khartoum, Sudan

Student Research Abstract: Trustworthy Remote Entities in the Smart Grid .................................................. 9
Smart Grid and Smart Technologies (SGST) Track
Andrew J. Paverd, Department of Computer Science, University of Oxford, United Kingdom

Student Research Abstract: Trust Decomposition with Inter-Component Rating and Performance Certificates ................................................................. 11
Trust, Reputation, Evidence and other Collaboration Know-how (TRECK) Track
Florian Volk, Techn. Universität Darmstadt, CASED, Germany

SAC 2013 SRC program is sponsored by Microsoft Research
